administering to a mammalian subject afflicted with cancer and treated with radiation therapy a composition comprising a therapeutically effective amount of glutamine or a pharmaceutically acceptable salt thereof, that protects the non-mucosal tissue against damage from the radiation therapy.

7. (Original) The method of claim 6 wherein the composition comprises carbohydrate in an amount effective to increase the absorption of glutamine by the subject.

8. (Original) The method of claim 6 or 7 wherein the composition allows the subject to be treated with a higher dose of radiation and/or treated with radiation for a longer time.

9. (Original) The method of claim 6 or 7 wherein the non-mucosal tissue is breast tissue or associated upper body tissue.

10. (Original) The method of claim 9 wherein the composition prevents increased breast density or lessens the severity of increased breast density.

11. (Original) The method of claim 6 or 7 wherein the composition prevents edema or lessens the severity of edema.

12. (Original) The method of claim 11 wherein the edema is of breast tissue.
13. (Original) The method of claim 6 or 7 wherein the non-mucosal tissue is skin.
14. (Original) The method of claim 6 or 7 wherein the composition protects the appearance of the non-mucosal tissue.

Claims 15-18 (Canceled).

19. (Original) A method of reducing or preventing pain arising from a non-mucosal tissue, the method comprising:
administering to a mammalian subject afflicted with cancer and treated with chemotherapy and/or radiation therapy a composition comprising a therapeutically effective amount of glutamine or a pharmaceutically acceptable salt thereof, that reduces or prevents pain in the non-mucosal tissue arising from the treatment.
20. (Original) The method of claim 19 wherein the composition comprises carbohydrate in an amount effective to increase the absorption of glutamine by the subject.
21. (Original) The method of claim 19 or 20 wherein the subject is treated with radiation therapy.
22. (Original) The method of claim 21 wherein the composition allows the subject to be treated with a higher dose of radiation and/or treated with radiation for a longer time.
23. (Original) The method of claim 19 or 20 wherein the subject is treated with chemotherapy and the composition allows the subject to be treated with a higher dose of a chemotherapeutic agent and/or treated with the chemotherapeutic agent for a longer time.

24. (Original) The method of claim 19 or 20 wherein the composition allows the reduction or elimination of the need for further pain control for the subject.

25. (Original) The method of claim 19 or 20 wherein the non-mucosal tissue is breast tissue.

26. (Original) The method of claim 19 or 20 wherein the non-mucosal tissue is skin.

Claims 27-43 (Canceled).
